Good evening, I have just downloaded from excel the Solver, successfully, but actually it doesn't work.

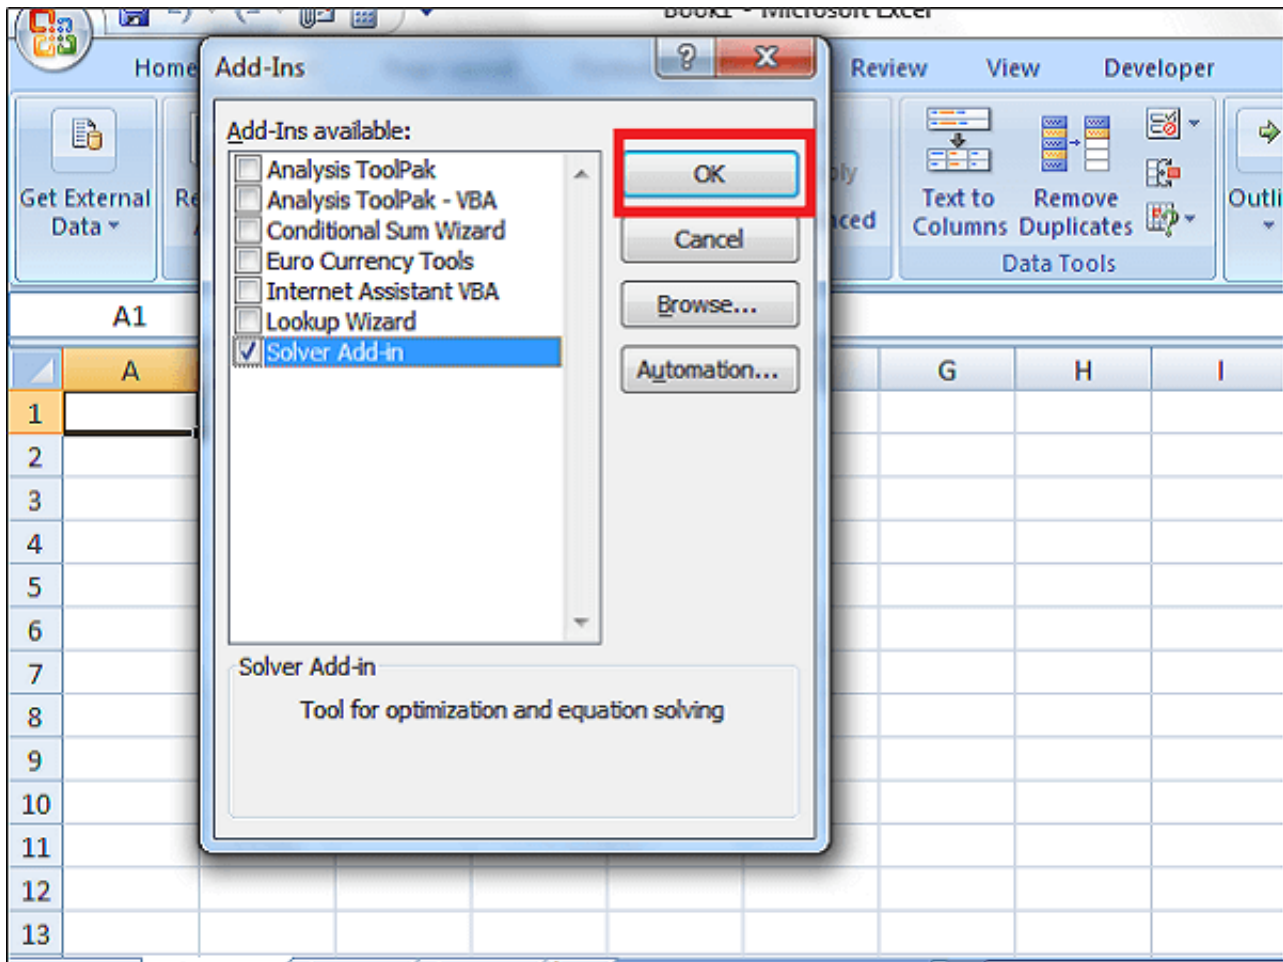

1. [solver excel](#)
2. [solver excel example](#)
3. [solver excel 2016](#)

How can I do? Actually it doesn't work, since I cannot do any kind of operation using directly the excel sheet on the solver.. Moreover, I cannot insert manually the cells, since it doesn't recognise the cells on the excel sheet.. zip .. This is a new version of SolverTable, created in October 2020 The essence of SolverTable has always been that it makes multiple uninterrupted Solver runs.. Install Solver Add-in for Excel for Mac PioSOLVER is a very fast GTO solver for Holdem.. In fact, once it opens the interface in which insert datas, I can't select the cell through which I have to operate.
