The VRX LAC offers an accurate and easy-to-learn design tool that allows configuration of VRX systems prior to deployment.. If your Mac has a Touch Bar, you can easily do quick calculations—without even moving the pointer.. Moreover, ground-supported stand mount and subwoofer stacked arrays can be modelled just as they are used with the VRX products.. “The VRX Line Array Calculator will provide an effective sound design and simulation tool that builds on the successful heritage of JBL’s VTX and VERTEC® Line Array Calculator software.. The VRX LAC includes a quick start help file that can get any VRX user up to speed and using the VRX LAC in under an hour.
